• Registration :

The screenshot displays the Visual Studio Code editor with a file named `reg_form.html` open. The code is written in HTML and defines a registration form. The form includes a title 'registration', a form action 'login', and three input fields: 'Full Name', 'Last Name', and 'E-mail'. Each input field has a label, a placeholder, and a required attribute. The code also includes a link to a stylesheet and a preconnect link to Google Fonts.

The screenshot shows the Visual Studio Code editor with the file `reg_form.css` open. The code defines styles for a registration form, including a static container, an input box, a gender title, a category, and a button. The Explorer sidebar on the left shows the project structure with files like `reg_form.html`, `login.html`, and `main.py`. The status bar at the bottom indicates the current cursor position is at line 98, column 18.

```
static > # reg_form.css > #cname
border: 1px solid #9b59b6;
padding-left: 15px;
font-size: 16px;
border-bottom-width: 2px;
transition: all 0.3s ease;
}

.input-box textarea {
font-family: "Poppins", sans-serif;
height: 45px;
width: 100%;
border-radius: 5px;
border: 1px solid #9b59b6;
padding-left: 15px;
padding-top: 10px;
font-size: 16px;
border-bottom-width: 2px;
transition: all 0.3s ease;
}

.gender-title {
text-transform: capitalize;
font-size: 17px;
margin-top: 30px;
}

.category {
display: flex;
width: 79%;
margin-bottom: 20px;
justify-content: space-between;
}

button {
height: 40px;
width: 100%;
```

The screenshot shows a web browser displaying a registration form titled "Registration". The form is set against a blue and purple gradient background. It contains several input fields for user information, including first and last names, email, password, phone number, date of birth, address, and PIN code. There are also radio buttons for gender selection and a dropdown for country name. A "Register" button is at the bottom of the form.
